Hi Gurus,

today one of my colleagues raised the simple question about
the 'CDF_EPOCH'/'CDF_EPOCH16' optional keywords of 'CDF_VARCREATE'.

this, indeed, seems ambiguous for my (may be limited) understanding
of the way the interpreter is handling keywords.

have I accidentally missed something in the documentation,
or is there some trick to avoid the

% Ambiguous keyword abbreviation: CDF_EPOCH.

error message?

hints welcome,
best regards,
martin.
