Hi everyone,

I have a problem reading a binary file.

The file begins with a Header of 6 unsigned Int.

After this I have to decide, if I want to read 12 bits oder 13 bits
(not byte) as one record.

Has someone an idea, how to read the 12 or 13 bits best.

After i read the bits I have so split them in the units, they stand
for.

Thanks

.

Greetz Dirk
