POINTER: Please see comp.lang.misc article dated Wed 01 Jul 92 04:38:41 GMT using keywords language, programming, poll, statistics for a poll regarding your use of languages. Thanks for your patience and for not flaming me for not putting your favorite in a box specifically. There are simply too many languages, and the poll would have been too big for posting. Please use the write-in box as much as you need.
Thanks in advance for your participation!
Cheers,
bw
