Subject: convert to pixel to RA and DEC in degrees?
Posted by adisn123 on Wed, 02 Aug 2006 16:28:15 GMT

Does anyone know a procedure which does converting job from pixel coordinates to RA and DEC in degrees using the image's fits header?

I know there is xyad procedure in IDL library, but I want my result goes up to double precision.

Is there any better one than xyad?

Thanks.
