Subject: Movie replacement
Posted by Jo Klein on Fri, 18 Aug 2006 10:44:27 GMT

Hi folks,
Does anyone know a good replacement for the old MOVIE procedure? I find
XINTERANIMATE quite tedious to use at the command line, it just takes
too many lines of code to loop through a volume, and it seems a bit of
overkill if you just want a quick look at a volume of data.
Thanks for your input,
Jo
