Subject: Weird Map Projection
Posted by David Fanning on Wed, 30 Aug 2006 18:37:20 GMT

Folks,

OK, here is a question from the mail bag that I don't know
the answer to.

How can I set up a map projection space, using MAP_SET
if possible, that has longitude 360 on the LEFT and
longitude 0 of the RIGHT.

Here is a picture from a Cassini radar map that illustrates
more or less what I am going for.

  http://tinyurl.com/j24nr

I want to overlay radar data onto something set up like
that. Is this done with MAP_SET, or is it done just by
setting up a data coordinate space that *looks* like a map?

Cheers,

David
