The legend.pro as distributed in 3.0 of PV-Wave won't adjust its text size with the !p.charsize system variable. The following corrects it:

```
*** legend.pro Tue Jan 15 18:56:10 1991
--- legend.pro.orig Tue Jan 15 17:03:09 1991
*****
*** 128,134 ****
    !P.PSym = MySyms (I)    ;Adjust the plot symbol
    OPlot, Line_X, Line_Y - I * Delta_Y ;Overplot the line segment
    !P.LineStyle = 0
!   XYOutS, Text_X, Text_Y - I * Delta_Y, Labels (I), charsize=Text_Size
    ;Print the label
EndFor

--- 128,134 ----
    !P.PSym = MySyms (I)    ;Adjust the plot symbol
    OPlot, Line_X, Line_Y - I * Delta_Y ;Overplot the line segment
    !P.LineStyle = 0
!   XYOutS, Text_X, Text_Y - I * Delta_Y, Labels (I); Text_Size
    ;Print the label
EndFor
