## Subject: ROI on map
Posted by catwithhat on Mon, 18 Sep 2006 17:42:41 GMT

Does anyone have a routine that allows you to define a region of
interest. ROI on a map projection? (direct graphics). For example,I
would define a map project, overlay a contour plot and then want to
interactively select region. The routine would return the vertices of
the perimeter of the polygon.

Thanks
Axel
