Dear All

I need to plot a smooth curve around the user defined plotting symbols..

The method I use is

```
plot, DAY, NOAA16,$
```

```
    charsize=2,Yrange=[0,3],Xrange=[Xmin,Xmax], /NODATA
```

```
oplot, DAY, NOAA16,psym=-8,color=3 ; statement 1
```

```
T = FINDGEN(96*(Xmax-Xmin))/96.+Xmin
```

```
Z=SPLINE(DAY,NOAA16,T)
```

```
oplot, T, Z,linestyle=1,thick=3 ; statement 2
```

I get a line from statement 1 and a line from statement 2

I do not need the line from statement 1

Sorry to bother you with the small questions..

thanks for all your help
