
Subject: How to deal with this error while using MAKE_DLL ?

I was trying to use the function MAKE_DLL to build a .dll file from .c file , but an error was encountered:

```
'cl' is not internal or external command, and is not .exe file or .bat  
file either.  
cl -D_DLL -DMSWIN -DWIN32 -D_MT /nologo /I"C:\RSI\IDL62  
\external\include" /c  
"C:\RSI\IDL62\external\call_external\C\incr_struct.c"  
/Fo"incr_struct_3856_MICROSOFT-5C334C.obj"
```

To solve this problem, I queried the value of the system variable !MAKE_DLL, the answer was as follows:

!MAKE_DLL.COMPLIER_NAME :

'Microsoft Visual C++ 7.0' :

!MAKE_DLL.CC :

```
'cl %X -D_DLL -DMSWIN -DWIN32 -D_MT /nologo  
/I"C:\RSI\IDL62\external\include" /c %C /Fo%X'
```

!MAKE_DLL.LD :

```
'link /out:%L /nologo /nodefaultlib /dll %O /def:%E  
"C:\RSI\IDL62\bin\bin.x86\idl32.lib" msvcrt.lib kernel32.lib %X'
```

However, the c compiler installed in my windows xp system is Microsoft Visual C++ 6.0, and I guess I need to change the value of !MAKE_DLL.CC and !MAKE_DLL.LD, but how to do this ?

Thanks!
