Subject: MPFIT for 21st Century
Posted by David Fanning on Mon, 25 Sep 2006 00:56:46 GMT

Folks,

Getting ready for an IDL class, I just noticed MPFIT
(indeed ALL of the programs on Craig's web page!!)
have been made ready for the 21st century with square
bracket subscripting. Oh, my goodness. Be still my
heart! :-)

Cheers,

David

P.S. Let's just say this may not be comparable to the
Holy See's pardon of Galleo, but it is at least as
unexpected. :-)
