I'm guessing you want to do this because your "cleanup"
code is in your EXIT button event handler. This is the
wrong place to put it. Rather, your "cleanup" code should
be in a CLEANUP (if you assign it to the TLB with XMANAGER)
or KILL_NOTIFY (if to assing it with the KILL_NOTIFY keywword)
callback procedure that is called when the widget associated
with the callback is killed.

Cheers,

David
