Could you please let me know if you get any answers. I have been looking for a scheme to read in the TOGA-COARE GMS-4 imagery that is in McIDAS format. I just found the format for McIDAS image file formats. Looks a little long. Not too bad overall. Just concerned about byte/bit orders.

If I dont get any replies III be starting to write a procedure hopefully a week or two from now. Collabarate -??

Regards

Barr-Kum
