Subject: Re: class_doit Maximum Likelihood errors Posted by peter.eddy@shaw.ca on Thu, 28 Sep 2006 18:24:34 GMT View Forum Message <> Reply to Message

It is difficult to troubleshoot the problem without seeing the code you are trying to run. First I would go back and check your training data file. The ML classification as im sure you know uses training data's variance / covariance matricies... Are your *.sta files or matricies present and formatted properly?? Were your training matricies developed on only four bands?

Pete
