Hi,

So, I am trying to create wrapper functions with the use of `_EXTRA`, `_REF_EXTRA`. I am not sure what I am doing wrong or if `_REF_EXTRA` can only be used for named arguments.

Why does the following give me the attached error?

`LOG_READ_JPEG, './testall/read_jpeg.jpeg', a`

```
PRO LOG_READ_JPEG, _REF_EXTRA=e
  COMPILE_OPT HIDDEN
  print, "foobar"
  READ_JPEG, _EXTRA=e
END
```

Error message:

```
  READ_JPEG, _EXTRA=e
              ^
```

% READ_JPEG: Incorrect number of arguments.

thanks,

dometz
