Subject: Re: vector of bin indices using histogram? Posted by greg michael on Wed, 18 Oct 2006 21:42:35 GMT View Forum Message <> Reply to Message

The last odd result prompted me to fix a problem with the FSB clock speed (for some peculiar reason it resets to 11.5x100 MHz once in a while), so now back at 16\*166 (or something like that), I get:

DIV: 2.3130000 MUL: 2.3429999

DIV still winning marginally, but with a different factor...
