Well, I don't know. All the filled triangles in SYMCAT seem
to work fine:

IDL> plot, findgen(11)
IDL> plots, 10, 3, psym=symcat(19), symsize=4

Do you suppose something is wrong with the way you
calculate the triangle?

Cheers,

David

P.S. You can find SYMCAT here:

  http://www.dfanning.com/programs/symcat.pro
