Subject: printing hexadecimal
Posted by Robert Moss, PhD on Wed, 01 Nov 2006 14:51:10 GMT

Being the lazy sort, I'm wondering if there is a built-in or user
routine around that will accept an array of bytes and output them (to
screen or file) as hexidecimal out there. I could write one, but as I
said, I'd prefer to have someone else to the grunt work :)

Thanks in advance,
