Hello. I am a beginner and I am having trouble with a loop. It's like this:

```
j=0
```

```
  for i=0,20 do begin
```

```
    if (data.field08[i]='V') then begin
```

```
      dataV.time[j]=data.field10[i]
```

```
      dataV.object[j]=data.field07[i]
```

```
      dataV.count[j]=data.field09[i]
```

```
      dataV.filter[j]=data.field08[i]
```

```
    endif
```

```
    j++
```

```
  endfor
```

if I delete j++, it works fine writing all to the 0.th. but I need j to increase each time. so I add j++ and receive an error message like this:

" Subscript range values of the form low:high must be >= 0, < size, with low <= high: <No name>"

how can I fix that? I will be thankful if you help me out with this.

good day.
