
Subject: Problem with compiling ENVI-BATCH routine

Hi!

I have write some procedure :

PRO, Something

```
compile_opt IDL2
envi, /restore_base_save_files
envi_batch_init, log_file='batch_log.txt'

;open some file
ENVI_OPEN_FILE, inImage, R_FID=fidImg

;get map info
mapImg = ENVI_GET_MAP_INFO(FID=fidImg)

; get data
mask = ENVI_GET_DATA(FID=fidImg, DIMS=dimsImg, POS=0)

....
envi_batch_exit
END
```

Compiling of this procedure throws syntax error on all lines with ENVI_GETMAP_INFO and ENVI_GET_DATA.
Solution is to run command: 'envi, /restore_base_save_files' first, and then compiling is done without errors.

Does anybody has any idea about this?
