Hi all,

Hope you can help.

I have an array of data of size 4915200, I want to keep data points  
0:639 and get rid of the next 128 data points and then keep the next  
640 and get rid of the next 128 and so on to the end of the array  
i.e.

0:639 keep  
640:767 discard  
768: 1407 keep  
1408: 1536 discard

etc

thanks in advance

Steven
