It just had a very silly error.

Was using

```
pos_image = [0.15,0.15,0.75,0.95]  
pos_bar = [0.75,0.2,0.85,0.8]
```

when x and y span of pos_image should have been the same as the image is square and I call tvimage with /keep_aspect_ratio. ie. I should have used:

```
pos_image = [0.15,0.2,0.75,0.8]  
pos_bar = [0.75,0.2,0.85,0.8]
```

Sorry for all the hassle. Thanks for writing the psconfig package. I'm sure I will use it many a time in future.
