
Subject: Duplicate heap variables recursively

Hello,

Is there an easy way of duplicating heap variables recursively (like
HEAP_FREE does for freeing heap variables).

Something like this (but then with more complicated referencing)

```
a=ptr_new({p:ptr_new(5)})  
b=duplicate(a)  
*(*b).p=10
```

So that `*(*a).p == 5` and `*(*b).p == 10`
