I have a sequence of plots which i want to convert to an mpg video
However, the quality of the mpg created is very bad in comparison to my
plots.

How can i increase resolution??

So far i only managed to change the x and y size of my picture.

I use the following code:

```
nfr=frames
xsize=1000
ysize=1000
mpegID=MPEG_OPEN([xsize,ysize])
.....
(here i do the plotting)
.....
mpeg_put,mpegID,WINDOW=0,FRAME=it-1,order=1
endfor
MPEG_SAVE,mpegID,FILENAME='movie.mpg'
MPEG_CLOSE,mpegID
```

Thanx in advance!!
