Subject: ENVI and the IDL Virtual Machine
Posted by lbusett@yahoo.it on Wed, 20 Dec 2006 08:49:34 GMT

Hi,

I would like to distribute an IDL application that uses of some of the
built-in ENVI routines (e.g., ENVI_GET_MAP_INFO, ENVI_INIT_TILE, ecc.)
with the IDL virtual machine.

Did anyone tried to do that ? Is it possible or the users need to have
an ENVI license in order to have access to ENVI routines ?

Thanks for your help,

Lorenzo Busetto
