Folks,

I received an interesting question this morning about my article
concerning how to draw a plot with a colored background. The question
was: how do you do this with !P.MULTI? As the answer involves
reasonably clever tricks with !P.MULTI[0] that I imagine some of
you haven't encountered before, I thought you might be interested, too.

You can find the answer and the details here:

  http://www.dfanning.com/graphics_tips/cbg.html

Cheers,

David
