Subject: How to write applications in JAVA using IDL
Posted by rusben on Thu, 21 Dec 2006 16:52:12 GMT

Hi,

I want to make a distribute application with JAVA, but I want to use
IDL for calculate and, if it's possible, to visualize data information.

Looking for some examples I found "IDL Export Bridge Assistant Module"
however it has a lot of limitations
if i'm not wrong:
(
 http://idlastro.gsfc.nasa.gov/idl_html_help/Programming_Limi tations.html
)

Can anybody explain me which is the best way to make my applications in
JAVA using IDL?

Thank you very much!
