This works fine for me:

pro out_to_tiff

```
    envi_select, title='Select MS image', $  
        fid=fid,dims=dims,pos=pos
```

```
    envi_output_to_external_format,fid=fid,$  
        dims=dims,$  
        pos=pos,$  
        /tiff,$  
        out_name='d:\temp\tst.tif'
```

end

Mort
