Ronn's page. This is just the IDLtoAVI souped up for IDL 6.3. :-)

I downloaded this the other day because I get asked about it so often I thought it might be nice to know a little something about what I was talking about. I found it very confusing.

Codecs, smodecs. How the hell to I know!?

I was thinking about updating my IDL Movie page into something a bit more sensible:

<http://www.dfanning.com/tips/howmovie.html>

But I realize it would be more of the blind leading the blind. I need someone to do it who knows more about it.

Wait, Mark! YOU know something about it. Why don't YOU write this page? :-)

Cheers,

David

P.S. I'd ask Rick to do it, but I asked him a simple question about codecs and I got back a 10 page treatise that was mostly indecipherable by me. It was all he could get together before he went on holiday. All of I could think was that if I had to understand that stuff for a living, I would need a holiday, too. :-(
