Is "objDB->Connect, CONNECTION = strConnectionString" working or not?

You're giving two different signals there, or is it just me :-) ?

If not, try the following:

```
objDB = OBJ_NEW('IDLdbDatabase')
ODBCstr="MyODBC"
objDB->Connect,datasource=mysqlinfo
```

; Added this to .odbc.ini (this is for MySQL, change driver etc. for yours!!!!!!):

```
;
;
;[ODBC Data Sources]
;...
;MyODBC=MySQL ODBC 3.51 Driver
;..
;..
;..
;..
;[MyODBC]
;Driver   = /usr/lib/libmyodbc3.so
;Description = MySQL ODBC 3.51 Driver
;SERVER    = servername
;USER      = username
;Password  = *****
;Database  = databasename
```
