It may be due in a fair bit to the fact that method one
calls 10 functions each iteration, and method 2 calls 1.
There is some overhead involved in each function call.

Personally I don't see that much of a difference
I get the opposite result: (removing the unkown trim function)
Elapsed time: 5.2030001 Seconds.

Elapsed time: 7.0630000 Seconds.

Cheers,
bob
