Ciao!!

Ragazzi... now something easy!

After working inside of IDL with some `envi_doit` I have the image in format ENVI in BSQ, BIL, or BIP.

When I export to TIFF the default (and only in BSQ?) is in BSQ, therefore I only know `ENVI_OUTPUT_TE_EXTERNAL_FORMAT` to make it.

Somebody can say me as to leave the ENVI/IDL with a TIFF in BIL or BIP?

Grazie
