Subject: IDL with new MacX 1.5 on PowerMac?
Posted by djackson on Tue, 24 Oct 1995 07:00:00 GMT

Hi all,

The last FAQ didn't mention the newest version of MacX, and I can't
recall seeing it mentioned here recently, so I ask:

Has anyone had IDL running on a Unix host, accessed remotely by a
PowerMac running MacX 1.5? Version 1.2 had problems, I understand, but
tales of any experiences with the new version would be appreciated.

Thanks in advance,
-Dick
