Hello All,

This is a error i got when using velovect.

terminal output -

```
"Compiled module: VELOVECT.
```

```
% PLOT: Error opening file.
```

```
File: /Users/cphatak/sims/resou
```

```
rice/fonts/hersh1.chr
```

```
No such file or directory"
```

i have got this once before. I just reset the terminal and everything works fine again. Any ideas why this might be happening?

thanks...

cheers,

-cd
