I created TIFF file but it's wrong image. It hold same dims, bands. So I don't understand why image become so strange. I load it in TrueColors in ENVI. It's become BLUE, and seems right part of image become the left part.

here is code

```
ENVI_DOIT,'ENVI_GS_SHARPEN_DOIT',FID=fid_src_mul, $
    DIMS=mul_dims, $
    POS=pos_mul, $
    METHOD=0, $
    OUT_NAME=full_file_name+'.IMG',$
    INTERP=0,$
    HIRES_FID=fid_Src_Pan, $
    HIRES_DIMS=pan_dims,$
    R_FID=pansharp_fid
;Creating TIFF
pos_mul=INDGEN(number_bands)
ENVI_FILE_QUERY,pansharp_fid,DIMS=pan_dims,NB=number_bands
ENVI_OUTPUT_TO_EXTERNAL_FORMAT,FID=pansharp_fid,$
    DIMS=pan_dims, $
    POS=pos_mul,$
    /TIFF,$
    OUT_NAME=full_file_name+'.TIF'
```

Thanks a lot
