Hello All,

I have an array of 2xn which is a list of coordinates (x,y positions) and I need to remove any duplicates in this array. Since they are x,y coordinates I cannot really sort the array, hence cannot use the Uniq function. Is there another way of doing this?

My array:

2	30
4	5
3	9
51	19
12	15
3	9
11	22
32	33
14	25
