Hi,

 I am using xvolume in IDL to view some 3d data.. Is there any way to
write this to an EPS file? I can see how to use xvolume_write_image
to write png or tiff , but not sure if eps available there.. I also
see in the edit menu a way to 'copy scene to clipboard as vectors' ,
so is there a way to go from there? Any suggestions greatly
appreciated..

Thanks,
Tal
