I would like to take this time to thank David for all the work he does. I was going to ask where I could find a function similar to symcat, as I remember seeing one somewhere during my work term. Perhaps this was it (although I thought it was at the ITTVIS code bank). I don't know how I can thank you for all the code and advice that you've made available (perhaps by buying your book). Now back to the lab report.

Braedley
