Hello group,

I have submitted a feature request to RSI for unicode support. They already have one request on file. I am hoping that by generating more noise from us, we can push this request up the priority queue.

I would personally like to use Greek and other character sets to code mathematical formulae.

I am guessing that our non-english speaking folks would also appreciate the convenience of using their native characters. Although, it may make IDL programs less shareable. I for one will not be able to review or modify a code written in any of the oriental or mid-eastern character sets.

Mirko
