I can't visualize it using TV. I'm doing something like...

```
;  
nbOfImages = 2  
  
filter = ["*.tif"]  
arr_img = ptrarr(NbOfImages)  
  
for i = 0, NbOfImages-1 do begin  
    arr_img[i] = ptr_new(dialog_pickfile(path = 'C:\RSI\IDL63\examples  
\data', filter = filter))  
endfor  
  
tv, *arr_img[0] ; My problem is here. this is only for testing. I  
wanted to visualize the  
;image in this point  
;  
;  
;  
Help me on that, please.
```
