More an disillusion!

So what do this "doit"????

With that inputs asks for an invitation to "make yourself"....

What it makes "/GEOREF there"? don't make rigorously nothing!

"USE_SEE_THROUGH" and "/SEE_THROUGH_VAL"????? What it makes this in an application that supposedly makes mosaic...

If I am to dream please wake up me for the life! In case that I oppose, after the disillusion of the morphologic operators and as much other things this idl/envi truly starts to tire!

ENVI_DOIT, 'MOSAIC_DOIT' [, BACKGROUND=integer], DIMS=array | FID=file ID
[, /GEOREF] [, /IN_MEMORY] [, MAP_INFO=structure] [, OUT_BNAME=string array], OUT_DT={1 | 2 | 3 | 4 | 5 | 6 | 9 | 12 | 13 | 14 | 15} |
OUT_NAME=string | PIXEL_SIZE=array | POS=array [, R_FID=variable] [, /SEE_THROUGH_VAL], USE_SEE_THROUGH=array | XSIZE=integer | X0=array | YSIZE=integer | Y0=array
