
Subject: Forcing display into 8-bit

Hi.
I was wondering if any one could give me a quick answer
as to how I can include into my program a routine that
tests to see if the display is 24-bit and if so, to
force it to display in 8-bit 256 colour mode. If
!D.N_colors equals 16 million it makes my manipulation
of colour tables troublesome. If this is trivial then
sorry for any waste of time :)
Thanx

Julian
