Hi folks!

I recently put a new site online which, of course, is coded with IDL (ION script). Aside from the fact that you might be amused to play around with it (there're something like 2 TB of images there), I'd very much appreciate any suggestions for improvements of any kind - especially in relation to the interface/ION side of things.

<http://www.geoinf.fu-berlin.de/hrscviewweb/>

many greetings,
Greg
