Folks,

The list of people who have contributed lists of books is growing. Don't let your list flounder!

<http://www.dfanning.com/reading/readinglists.html>

I've heard from several people that the act of choosing five books is both more interesting and more difficult than they had imagined. I found it that way, too.

I'm beginning to see several books appear more than once, although it is too soon to discern a pattern. Perhaps when we add YOUR list! :-)

Cheers,

David
