Subject: about IDL programming
Posted by gtbargavi on Sat, 24 Mar 2007 17:48:32 GMT

Hi .....
 I am trying flow direction in IDL using DEM for which i started with
the directional filtering program, but did not get any output as my
file was not .dat file format (but an ascii file) Also guide me if
there is any way to find flow accumulation too subsequently. will
there be any need to convert my ascii file into .dat file for further
programming to be done?
thanks
