Dear All,

I am having 4 base widgets by name A, B, C, D. All are independent widgets.

Base Widget A has some objects by name A1, A2, A3, A4

and Base Widget B has some objects B1, B2, B2,B3, B4

Like wise base widget C has C1,C2,C3,C4.

My intension is to exchange the values between B1 and C1 or A1 to B1 i.e., passing the values of various objects that lie in different bases.

Please provide me a solution.

Regards,
Prahlad V
