While we're on this subject, does anyone know where to find a comprehensive list of X resources used in the core IDL routines, and what they do? I couldn't find much helpful information in the IDL manuals. The X resources set in my .Xdefaults are

Idl.colors: -5

Idl\*threeD: TRUE

Idl\*scale: 10

Idl\*foreground: white

Idl\*background: mediumPurple4

Idl\*topShadowColor: white

Idl\*bottomShadowColor: PeachPuff2

Idl\*inputFocusColor: green

but at the moment I'm not even sure what all of these do. Some of them may be set to ridiculous values because I was trying to find out.

Thanks,  
Mark
