O> I have tested IDL 6.2 on another linux box (Debian sarge) without any
> crashes so far.

There is an active thread about the problems with IDL on Debian etch going on at the "competing" IDL discussion group, e.g.
<http://www.itvis.com/forum/message.asp?fmid=2267>

So far, there are some workarounds listed, but there doesn't seem to be a solution that consistently works.
