Oh, we can have fun with this.

Starting with Qing reply....

```
IDL> print, double(4.7)
4.6999998
```

How about this...

```
IDL> print, 4.7D
4.7000000
```

Or, even this...

```
IDL> print, DOUBLE(4.7E1)
47.000000
```

Even stranger

```
IDL> print, DOUBLE(STRING(4.7,FORMAT='(F0)'))
4.7000000
```
