```
Hi Guys,
There's something I can not explain to myself, so maybe someone can
enlighten me?
print, fix (4.70*100)
   469
and also:
print, string (4.70*100, format='(i3)')
469
While, everything else that came into my head to try was OK like:
print,fix(5.70*100)
   570
print,fix(3.70*100)
   370
print, fix (4.60*100)
print, string(4.60*100, format='(i3)')
460
etc..
Thanks in advance!
Cheers.
Boryana
